

## HOSPITAL 90 PSI STEAM PIPE HEADER

Surface Temperature before [HPC® COATING](#) application **311°F \ 155°C**

Mixing until the HPC® COATING is a spray able consistency

Applying HPC® COATING with a hopper gun to 250 mils \ 6.35 mm DFT (1/4")

Surface Temperature after application to meet OSHA requirement 139°F \ 59°C

Due to the characteristics of the HPC® COATING any chance of CUI ([Corrosion Under Insulation](#)) is eliminated.
