

CAUSTIC AND CORROSION TANK PROTECTION

Preparation of steel substrate by high pressure water blast and Xylene wipe to assure a clean, DRY and sound substrate ready to accept a protective coating system.

RUST GRIP® applied as both a primer \ base and a top coat for long lasting rust proofing.

RUST GRIP® has passed **15000 hours** of salt spray testing which equals marine specifications (DNV Certification)

Thermal
Fire
Corrosion

Call Us for more information at 604-576-2212

RUST GRIP® applied as a primer coat inside the tank.

LINING - KOTE® applied in 2 coats @ 16 mils WFT = 8 mils DFT cross hatched to protect steel from **pH 3 caustic solution** inside the tank.

IF **CORROSION** OR **CAUSTICS** ARE A PROBLEM ON ANY STRUCTURE OR EQUIPMENT . . .
