

VANCOUVER ABORIGINAL FRIENDSHIP CENTER VANCOUVER

RUST GRIP® and **SUPERBASE (HS)**® plus **SUPERTHERM**® topped
with **ENAMO GRIP**®

Problems: leaking and rusting metal roof, flaking coating on flashing, heat expansion \ contraction of the substrate leading to opening of seams and screws popping out.

Solution: Primer Coat with **RUST GRIP**® to permanently seal in the rusting metal, caulk seams and screws with **SUPERBASE (HS)**®, Base Coat with **SUPERTHERM**® to insulate and stop heat expansion plus added UV protection, Top Coat with **ENAMO GRIP**® to provide a lasting impact resistant, low maintenance finish up to and including GRAFFITI.

RUST GRIP® on metal roof panels

SUPERBASE (HS)® on seams and screws SUPERTHERM® 1ST COAT

SUPERTHERM® provides the added environmental benefit of a reduced HEAT ISLAND EFFECT.

SUPERTHERM® 2ND COAT ENAMO GRIP® TOP COAT

ENAMO GRIP® ON FLASHING
