

ISLAND TAN SURREY, BC

April 2006

The Palm Grass roof of each tanning bed was coated with **SAFECOAT LATEX**® intumescent coating tinted to the approximate colour match in order to meet Fire code compliance of a Class " A " flamespread rating. **SAFECOAT CLEAR**® intumescent varnish system was used to protect the bamboo reed walls and provide the same Fire code compliance of a Class " A " flamespread rating. Every Island Tan location has been coated with the identical protective coating system. This is the latest addition to the franchise.
